CERTIFICATE OF CONFORMITY
WITH THE CLEAN AIR ACT OF 1990 ISSUED TO:
Jane Armstrong

ROVER GROUP LTD.

ROVGP-LDT-97-02-00

JUN 26, 1996*

MANUFACTURER

CERTIFICATE NO.

EFFECTIVE DATE

*Revised AUG 8, 1996

OFFICE OF MOBILE SOURCES

Date Issued: AUG 8, 1996

Pursuant to section 206 of the Clean Air Act (42 U.S.C.7525) and 40 CFR Part 86, this certificate of conformity is hereby issued with respect to test vehicles which have been found to conform to the requirements of the regulations on Control of Air Pollution from New Motor Vehicles and New Motor Vehicle Engines (40 CFR Part 86) and which represent the following models of new motor vehicles, by engine family and evaporative emission family, more fully described in the application of the above named manufacturer:

LAND ROVER LTD : LAND ROVER DEFENDER 90 , LAND ROVER DISCOVERY .

Vehicles covered by this certificate have demonstrated compliance with the applicable emission standards at high and low altitudes as more fully described in the manufacturer's application.

This certificate covers engine family VLR4.658GFEK/evaporative emission family VLR1060AYPBC, including 4.6- and 4.0-liter engines with electronic fuel injection, three-way catalyst(heated oxygen sensor) and feedback control of fuel/air ratio , Multiple point fuel injection , charcoal canister control systems, and closed crankcase emission control systems, designed to meet emission standards specified in 40 CFR 86.096-9 at both high and low altitudes as specified in the application. These vehicles are equipped with an emission control device which the administrator has determined will be significantly impaired by the use of leaded fuel. This certificate is issued subject to the conditions specified in 40 CFR 80.24.

This certificate of conformity covers only those new motor vehicles or new motor vehicle engines which conform, in all material respects, to the design specifications that applied to those vehicles or engines described in the documentation required by 40 CFR Part 86 and which are produced during the 1997 model year production period stated on this certificate of the said manufacturer, as defined in 40 CFR Part 86.

Catalyst-equipped vehicles designed to be operated on gasoline or flexible fuel, otherwise covered by this certificate, which are driven outside the United States, Canada, Mexico, Japan, Australia, Taiwan and the Bahama Islands will be presumed to have been operated on leaded fuel resulting in deactivation of the catalysts. If these vehicles are imported or offered for importation without retrofit of the catalyst, they will be considered not to be within the coverage of this certificate unless included in a catalyst control program operated by a manufacturer or a United States Government Agency and approved by the Administrator.

In the case of completely assembled vehicles, this certificate of conformity covers only vehicles which are completely manufactured prior to January 1, 1998. Normally incompletely assembled vehicles (such as cab chassis) may be completed after this date, provided that the basic manufacturing (including installation of the emission control system) was completed prior to January 1, 1998.

This certificate does not cover vehicles or engines imported, sold, offered for sale, or introduced, or delivered for introduction into commerce in the U.S. prior to the effective date of the certificate.
